Skills

- Proficiency developing C++, Java, and Python code
- Skilled in web development with HTML, CSS, and Javascript
- Experience with Node.js and React frameworks
- Understanding of complex algorithms and data structures
- Strong grasp of underlying mathematical foundations
- Eagerness to explore more about many subfields of computer programming

Education

University of California, Riverside/Bachelor

Sept 2020 - PRESENT

I am currently a fourth year student at UCR working on a bachelors in computer science. Having switched from a math degree in my second year, I will complete my degree in the summer session of this year. In my classes, I was taught programming in C++ and my knowledge in other languages is self-taught but based on the object-oriented programming that I grew accustomed to.

Experience

UPS Regional Air Hub, Ontario Airport/Unloader

July 2021 - October 2021

I worked this job over the summer break between my first and second year at school. I categorized and unloaded the contents of cargo brought from the incoming planes. Here I learned about consistent, hard work and working with others who expect me to perform.

Kumon Learning Center, Jurupa Valley/Grader

2017 - 2020

My job as a tutor involved instructing students primarily in math from basic algebra to college-level calculus. I also graded their homework packets for mistakes and corrections.

Hideout Pizza and Grill, Anaheim/Various Roles

March 4, 2019 - November 3, 2023

The Hideout was owned and operated by my family and I spent most of my weekends helping out there in any way I could. I drove for deliveries, took orders, sometimes made food, and anything else that was needed.
