PROFILE

Recent graduate with a passion for coding and a strong desire to begin my career in earnest. In my studies, I have learned about a variety of topics that I am excited to practice and explore further.

EMPLOYMENT HISTORY

Hideout Pizza and Grill   Anaheim
Mar 2019 — Nov 2023

- Assisted my family-owned business with various tasks including deliveries, taking orders, and food preparation.
- Gained experience in customer service, multitasking, and versatility in my role.

Kumon Learning Center   Jurupa Valley, CA
Sep 2017 — Dec 2020

- Instructed students in math up to college-level calculus.
- Graded homework packets and provided feedback for improvement.

UPS Regional Airhub   Ontario, CA
Jul 2021 — Oct 2021

- Worked here as a summer job between the first and second years of college.
- Categorized and unloaded cargo from incoming planes.
- Developed skills in consistency, hard work, and teamwork.

EDUCATION

Bachelor's in Computer Science, UC Riverside   Riverside, CA
Sep 2020 — Sep 2024

CUSTOM PROJECTS

Melee Malders

A 2D fighting game developed with a small team. It is published here and this is the GitHub.

Emulated Tetris Machine

Constructed a replica of Tetris with a breadboard circuit using a micro-controller, shift registers, and an LED matrix with custom code. Here is a link to the GitHub with photos.

UB-04 Processor

Senior year final project made in collaboration with a team. Users can upload a UB-04 form, the standard medical receipt issued by hospitals, and over 200 fields are returned as data through optical character recognition. Link to GitHub.
